

StarFix[®]

FFT

Direct Masonry Fixing

- ▶ **No Plug Required**
- ▶ **High Strength Stress Free**
- ▶ **50% Quicker Assembly**
- ▶ **30% Less Drive-in Torque Required**

High Tech Fixing

The **StarFix FFT** Direct Masonry Partial Countersunk Fixing, threads directly into pre-drilled pilot holes - **no anchor or plug is needed**. Unique self tapping star thread with a spaced hi-lo thread form, provides ultimate grip and allows for multiple re-fixing - without stripping the tapped hole.

- ▶ No plug required - Cost effective and simple
- ▶ Only 6mm or 6.5mm pilot hole required through frame, reinforcement and brickwork
- ▶ Universal for all common applications
- ▶ Long lasting and stress free stand-off fixing

Safe

The precision T30 hexalobular recess provides optimum drive efficiency, improving grip & extending bit life.

Secure

High thread cuts into masonry whilst the low thread compacts loose material. This gives better resistance to the fixing pulling out of the masonry base due to more effective thread engagement.

Faster & No Wastage

No need for a plastic plug means a quicker application. **StarFix FFT** Direct Masonry Fixings eliminate the wastage associated with nylon installation fixings.

Lower Torque

The highly efficient, unique star thread lowers torque and achieves optimum, plug-less insertion into all kinds of brick, stone, concrete and wood.

Extensive Range

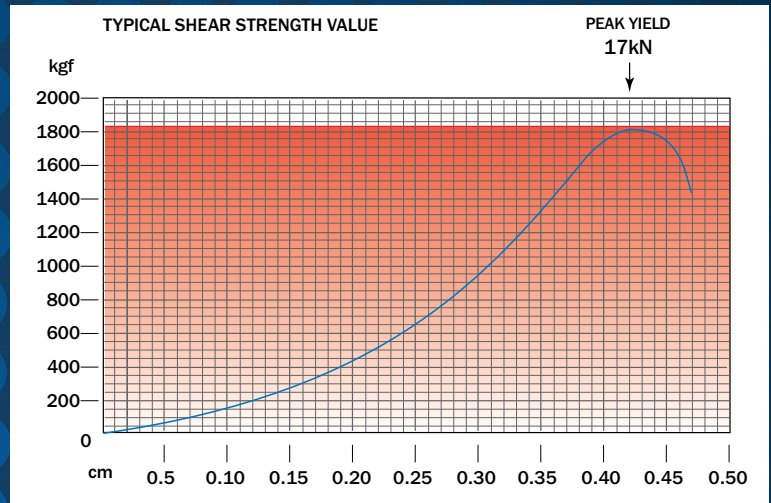

Nine size variations from 62mm to 202mm ensure there is a StarFix masonry anchor available for all applications.

Safe and Strong

Safer, stronger installations with a large diameter steel fixing.

Suggested minimum screw-in depths

* Average pull out figures are typical values and ultimate pull out will be dependant on the condition of the material. It is recommended that any user establish the nature and condition of any substrate prior to useage and always apply a suitable safety factor.
